

**Capacity utilization in the segment of information systems has not yet improved
Short-time working at affiliate Conrac GmbH**

The Munich based company Data Modul is a leading European Corporation in the area of display technology. Data Modul develops, manufactures and distributes innovative flat displays, electronic sub-assemblies, and complete information systems.

The economical and project related capacity utilization in the segment of information systems has not yet been improved. Therefore, the short-time working at the Weikersheim site of Conrac GmbH will be continued in April in an extended way. This measure does not regard the Data Modul AG at the moment.

The figures for the first quarter 2009 will be released on 28th of April 2009.
