

# DATA MODUL expands curved display range

Munich, 21 May 2025

With the 27" curved monitor, DATA MODUL AG is expanding its portfolio with a new model that impresses with its modern design and versatility. Like all models in the curved monitor family, this monitor has been specially developed for demanding applications that place the highest requirements on visual presentation and user interaction.

The 27" C-curved monitor in landscape format with a radius of 500 is ideal for applications where an excellent visual display and precise touch interaction are required. Whether in the control of lighting and sound systems, as an interactive source of information in shopping centres as a central element in modern self-service solutions or in entertainment applications such as button decks and bartops – the monitor offers the perfect combination of functionality and design. It is also ideal for demanding applications such as robot-assisted operations, where the ergonomic advantage of a curved display helps to reduce the strain on the surgeon. The monitor can also be used in transport and marine applications as an information and navigation display, for example to show routes or maps.

The FHD resolution of 1920x1080 and a brightness of 450 cd/m<sup>2</sup> ensure outstanding readability, while the integrated PCAP touch sensor enables precise interaction. The monitor also offers connections such as DP1.2, DVI-I and USB-B (for touch), making it easy to integrate into various systems.

Special features of this curved monitor are the 4 mm thick protective glass, the futuristic design and the optimised touch performance. The modular concept also enables individual customisation, such as customer-specific cover glass, special firmware, LEDs and controllers as well as tailored touch settings.

Technological challenges such as the 500 panel radius, the glass radius and inhouse OCA bonding have been successfully mastered. These innovations can also be found in other models in the curved monitor family, such as the 43" C/J/P, 49" J/P and 55" J/P. The 27" curved monitor is available now.
