

# Modular product concept to create demanding system solutions

For many years we have been designing, developing and manufacturing customer-specific monitor and panel PC solutions for a wide range of market-specific applications based on a modular product concept. This makes us the ideal partner for complex and challenging product designs.

## Portfolio

- > Touchdisplays: Resistive, PCAP
- > Preassembly unit (with frame, with/without electronics)
- > Open Frame (including back cover and EMI protection)
- > PanelPC (ARM/x86)
- > Monitor (up to 4K)
- > Computer-on-Modules
- > BoxPc

## Features

- > Latest in-house x86 & ARM computing platforms
- > Thermal system integration
- > IoT ready system solutions
- > Latest display interfaces and inputs
- > Customized images for embedded operating systems
- > BoxPc

## USPs

- > One-Stop-Shop for industrial needs: from idea to final solution
- > Full custom designs
- > Broad standard solutions available
- > Comprehensive inhouse engineering support: mechanics and electronics, bonding, qualification, touch development
- > Design to Cost
- > Short time to market
- > Adaption and integration of all available displays (TFT-LVDS, TFT-TTL, eDP) incl. inverters, tested cables and adapted power ON/OFF timing
- > All from a single source: Accessories like memory modules, mass-storage and IO modules

## Your benefits

- > Over 40 years of experience
- > Engineer-to-Engineer Support: Display, Touch & Embedded FAE team
- > Tuning the complete system to the customers needs
- > Evaluate various touch, display and embedded technologies in order to find the right product for your application
- > Seamless integration of all system components, mechanics & assembly
- > Inhouse Engineering Team for X86 (Atom and Core) and ARM development

With our modular product concept, all technology areas of our company are combined into one system. Thanks to modern display technologies, state-of-the art embedded boards and controllers as well as innovative touchscreen finishing methods and versatile housing variations, we offer real value-added services and solutions.
