

## Display special formats & solutions by DATA MODUL

Exciting designs are now almost a classic requirement for creating products with high recognition value. But not only the effect of attracting attention can be increased by an appropriate look, an appealing design also contributes directly to the value of the respective product.

From curved to flexible to stretched - we offer an extensive portfolio with a variety of shapes, sizes and technologies to accommodate design requirements for modern applications.

### Technologies

- > Passive LCM
- > PM OLED
- > E-Paper
- > TFT
- > AM OLED
- > MIPS

### Applications

- > Automotive
- > Marine
- > Medical sensorics (glucose meter, oximeter, clinical thermometer...)
- > Wearables (bracelet, smart watch, sport watch,...)
- > White goods
- > Remote controls
- > Gaming
- > ESL

### Sizes

- > Stretched: 2.9" – 47"
- > Round: 1.2" – 23.6"
- > Display with hole: 4.7"
- > Square: 1.3" – 26"
- > Curved Displays: 23.8" – 55"
- > Flexible: 1.36" – 1.81"

### Your benefits

- > Support from idea to mass production
- > Free product design
- > High creative freedom
- > High recognition value of own products
- > Customized solution in all available technologies
- > Ultra thin formats
- > Flexible design possibilities (bending radius up to 40mm)
