1. Application

This Specification is applicable to 255.85 mm (10.1 inch) Blamview TFT-LCD monitor for non-military use.

◎ TOPPAN makes no warranty or assume no liability that use of this Product and/or any information
including drawings in this Specification by Purchaser is not infringing any patent or other intellectual
property rights owned by third parties, and TOPPAN shall not grant to Purchaser any right to use
any patent or other intellectual property rights owned by third parties. Since this Specification contains
TOPPAN's confidential information and copy right, Purchaser shall use them with high degree of
care to prevent any unauthorized use, disclosure, duplication, publication or dissemination of
TOPPAN's confidential information and copy right.

◎ If Purchaser intends to use this Products for an application which requires higher level of reliability
and/or safety in functionality and/or accuracy such as transport equipment (aircraft, train, automobile, etc.),
disaster-prevention/security equipment or various safety equipment,
Purchaser shall consult TOPPAN on such use in advance.

◎ This Product shall not be used for application which requires extremely higher level of
reliability and/or safety such as aerospace equipment, telecommunication equipment for trunk lines,
control equipment for nuclear facilities or life-support medical equipment.

◎ It must be noted as an mechanical design manner, especial attention in housing design to prevent
arcuation/flexure caused by stress to the LCD module shall be considered.

◎ TOPPAN assumes no liability for any damage resulting from misuse, abuse, and/or
miss-operation of the Product deviating from the operating conditions and precautions
described in the Specification.

◎ It shall be mutually conferred if nonconforming defect
which result from unspecified cause in this specification arises.

◎ If any issue arises as to information provided in this Specification or any other information,
TOPPAN and Purchaser shall discuss them in good faith and seek solution.

◎ TOPPAN assumes no liability for defects such as electrostatic discharge failure occurred
during peeling off the protective film or Purchaser's assembly process.

◎ This Product is compatible for RoHS(2.0) directive.

Object substance	Maximum content [ppm]
Cadmium and its compound	100
Hexavalent Chromium Compound	1000
Lead & Lead compound	1000
Mercury & Mercury compound	1000
Polybrominated biphenyl series（PBB series）	1000
Polybrominated biphenyl ether series（PBDE series）	1000
Bis(2-ethylhexyl)phthalate series(DEHP series)	1000
Butyl benzyl phthalate series(BBP series)	1000
Dibutyl phthalate series(DBP series)	1000
Diisobutyl phthalate series(DIBP series)	1000

2. Outline Specifications

2.1 Features of the Product

- 10.1 inch diagonal display, 1280 x RGB [H] x 800 [V] dots.
- 16.7 Million colors.
- 2.5V/8.2V voltage double power source.
- Timing generator [TG], Counter-electrode driving circuitry, Built-in power supply circuit.
- High bright white LED back-light, Built-in backlight drive circuit.
- Sunlight readable TFT-LCD Monitor (Blanview TFT-LCD, improved outdoor readability)

	Indoor		Outdoor	
	Readability	Power Efficiency (Battery Life)	Readability	Power Efficiency (Battery Life)
Transmissive	Good	Good	Average	Poor
Transflective	Average	Poor	Good	Good
Blanview	Good	Good	Excellent	Excellent

2.2 Display Method

| Items	Specifications	Remarks
Display type	16.7 Million colors. Blanview, Normally black.	
Driving method	a-Si TFT Active matrix. Line-scanning, Non-interlace.	
Dot arrangement	RGB stripe arrangement.	Refer to "Dot arrangement"
Signal input method	8bit LVDS Interface.(VESA format)	
Backlight type	High bright white LED.	
NTSC ratio	(50) %	

Fig.1 Dot arrangement (backside PCB placed down side)

TOPPAN INC.

\<Features of Blanview\>   (A 7.0" WVGA display is shown as a typical sample)

Blanview is a TFT-LCD monitor that achieves sunlight readability with low power consumption.

Blanview (1000cd/㎡)   Transmissive (1000cd/m² MODEL)
*Display image comparison photo outdoors (at 100,000lx)

* When compared at the same power consumption, Blanview's contrast at 100,000lx is more than two times higher than that of a transmissive LCD (1000cd/㎡ model). Blanview's contrast is 17.5, while that of a transmissive LCD is 7.5. Sunlight readability is Good with a contrast of 8 or higher on the TOPPAN index. (Contrast at 100,000lx is reference data.)

- Backlight power consumption required to assure visibility. (equivalent to 7.0"WVGA)
Sunlight Readable / BL Power comparison

	Sunlight Readable	BL Power
Transmissive LCD (1000cd/㎡ Model)	Average	Poor
Blanview-F	Excellent	Excellent

In bright environment, other companies' products require higher brightness, which increases power consumption, However TOPPAN' Blanview can maintain low power consumption without increasing brightness (visibility is not easily affected by the environment).

Transmissive LCD (1000cd/m² MODEL) consume a lot of power, which places a large load on the customer's power circuit, causing problems such as heat generation.
Blanview has low power consumption, so it places a low load on the customer's power supply circuit and does not cause any harmful effects such as heat generation.
*Observation image with thermograph

TOPPAN INC.

3. Dimensions and Shape

3.1 Dimensions

Items	Specifications	Unit	Remarks
Outline dimensions	(231.08) [H] × (149.6) [V] × (9.1) [D]	mm	
Active area	(216.96) [H] × (135.60) [V]	mm	Diagonal 255.85 mm
Number of dots	3840 [H]×800 [V]	dot	
Dot pitch	56.5 [H]×169.5 [V]	um	
Surface hardness of the polarizer	(T.B.D.)	H	(4.90)N
Weight	(T.B.D.)	g

- Recommended connector : P-TWO   [196415-40041-36]
- Please make sure to check a consistency between pin assignment in "3.2 Outward Form" and
  your connector pin assignment when designing your circuit.
  Inconsistency in input signal assignment may cause a malfunction.
- NC terminal should be open, Do not conect anything.
- The terminals of the installed connector are gold plated. Using gold-plated FFC/FPC terminals is recommended.

TOPPAN INC.

(Backlight)

Item	Symbol	Condition	Rating			Unit	Applicable terminal
			MIN	TYP	MAX		
Forward current	IL	Ta=25 °C	-	(40.0)	(54.0)	mA	LED+ - K1,K2,K3 K4,K5,K6
Forward voltage *Reference value	VF	Ta=25 °C IL=(40.0)mA	-	(T.B.D.)	(T.B.D.)	V	LED+ - K1,K2,K3 K4,K5,K6
Estimated Life of LED Note	LL	Ta=25 °C IL=(40.0)mA	--	(70,000)	--	hrs	

Note: - The lifetime of the LED is defined as a period till the brightness of the LED decreases to the half of its initial value.
- This figure is given as a reference purpose only, and not as a guarantee.
- This figure is estimated for an LED operating alone.
  As the performance of an LED may differ when assembled as a monitor.
- Estimated lifetime could vary on a different temperature and usually
  higher temperature could reduce the life significantly.
  As the performance of an LED may differ when assembled as a monitor.
- Estimated lifetime could vary on a different temperature and usually
 higher temperature could reduce the life significantly.

13. Handling Instruction

13.1 Cautions for Handling LCD panels

⚠️ **Caution**

---

(1) Do not make an impact on the LCD panel glass because it may break and you may get injured from it.

(2) If the glass breaks, do not touch it with bare hands.
（Fragment of broken glass may stick you or you cut yourself on it.

(3) If you get injured, receive adequate first aid and consult a medial doctor.

(4) Do not let liquid crystal get into your mouth.
（If the LCD panel glass breaks, try not let liquid crystal get into your mouth even toxic property
of liquid crystal has not been confirmed.)

(5) If liquid crystal adheres, rinse it out thoroughly.
（If liquid crystal adheres to your cloth or skin, wipe it off with rubbing alcohol or wash it thoroughly with soap.
If liquid crystal gets into eyes, rinse it with clean water for at least 15 minutes and consult an eye doctor.

(6) If you scrap this products, follow a disposal standard of industrial waste
that is legally valid in the community, country or territory where you reside.

(7) Do not connect or disconnect this product while its application products is powered on.

(8) Do not attempt to disassemble or modify this product as it is precision component.

(9) If a part of soldering part has been exposed, and avoid contact (short-circuit)
with a metallic part of the case etc. about Circuit board of this model, please.
Please insulate it with the insulating tape etc. if necessary.
The defective operation is caused, and there is a possibility to generation of heat and the ignition.

(10) For protection your circuit, we recommend you to add excess current protection circuit to power supply.

Caution

⚠️ **This mark is used to indicate a precaution or an instruction which,
if not correctly observed, may result in bodily injury, or material damages alone.**

TOPPAN INC.

13.2 Precautions for Handling

1)	Wear finger tips at incoming inspection and for handling the TFT monitors to keep
	display quality and keep the working area clean.
	Do not touch the surface of the monitor as it is easily scratched.

2)	Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static charge and discharge
	when handling the TFT monitors as the LED in this TFT monitors is damageable to electrostatic discharge.
	Designate an appropriate operating area, and set equipment, tools, and machines properly when handling this product.

3)	Avoid strong mechanical shock including knocking, hitting or dropping to the TFT monitors for protecting their glass parts.
	Do not use the TFT monitors that have been experienced dropping or strong mechanical shock.

4)	Do not use or storage the TFT monitors at high temperature and high humidity environment.
	Particularly, never use or storage the TFT monitors at a location where condensation builds up.

5)	Avoid using and storing TFT monitors at a location where they are exposed to direct
	sunlight or ultraviolet rays to prevent the LCD panels from deterioration by ultraviolet rays.

6)	Do not stain or damage the contacts of the Connector
	FPC cable needs to be inserted until it can reach to the end of connector slot.
	During insertion, make sure to keep the cable in a horizontal position to avoid an oblique insertion.
	Otherwise, it may cause poor contact or deteriorate reliability of the Connector.

7)	Peel off the protective film on the TFT monitors during mounting process.
	Refer to the section 13.5 on how to peel off the protective film.
	We are not responsible for electrostatic discharge failures or other defects occur when peeling off the protective film.

13.3 Precautions for Operation

1)	Since this TFT monitors are not equipped with light shielding for the driver IC,
	do not expose the driver IC to strong lights during operation as it may cause functional failures.

2)	In case of powering up or powering off this LCD module,
	be sure to comply the sequence as instructed in this specification.

3)	Do not plug in or out the FPC cable while power supply is switch on.
	Plug the FPC cable in and out while power supply is switched off.

4)	Do not operate the TFT monitors in the strong magnetic field. It may break the TFT monitors.

5)	Do not display a fixed image on the screen for a long time.
	Use a screen-saver or other measures to avoid a fixed image displayed on the screen for a long time.
	Otherwise, it may cause burn-in image on the screen due the characteristics of liquid crystal.

TOPPAN INC.

13.4 Storage Condition for Shipping Cartons

(Storage environment)
- ・ Temperature   0 to 40°C
- ・ Humidity   60%RH or less
         No-condensing occurs under low temperature with high humidity condition.
- ・ Atmosphere   No poisonous gas that can erode electronic components and/or
         wiring materials should be detected.
- ・ Time period   1 year
- ・ Unpacking   To prevent damages caused by static electricity, anti-static precautionary measures
         (e.g. earthing, anti-static mat) should be implemented.
         After unpack, keep product in the appropriate condition,
         otherwise bubble seal of Protective film may be printed on Polarizer.
- ・ Maximum piling up   (8) cartons

*Conditions to storage after unpacking

(Storage environment)
- ・ Temperature   0 to 40°C
- ・ Humidity   60%RH or less
         No-condensing occurs under low temperature with high humidity condition.
- ・ Atmosphere   No poisonous gas that can erode electronic components and/or
         wiring materials should be detected.
- ・ Time period   1 year (Shelf life)
- ・ Others   Keep/ store away from direct sunlight
         Storage goods on original tray made by TOPPAN.

13.5 Precautions for Peeling off the Protective film

The followings work environment and work method are recommended to prevent the TFT monitors from static damage or adhesion of dust when peeling off the protective films.

A) Work Environment
   a) Humidity: 50 to 70 %RH, Temperature15 to 27°C
   b) Operators should wear conductive shoes, conductive clothes, conductive finger tips and grounded wrist-straps.
       Use an electrostatic neutralization blower.
   c) Anti-static treatment should be implemented to work area's floor.
       Use a room shielded against outside dust with sticky floor mat laid at the entrance to eliminate dirt.

B) Work Method

    TBD

TOPPAN INC.

APPENDIX

Reference Method for Measuring Optical Characteristics and Performance

1. Measurement Condition

Measuring instruments: CS2000〔KONICA MINOLTA〕, RD-80SA(TOPCON),EZcontrastXL88〔ELDIM〕
Driving condition: Refer to the section "Optical Characteristics"
Measured temperature: 25°C unless specified
Measurement system: See the chart below. The luminance meter is placed on the normal line of measurement system.
Measurement point: At the center of the screen unless otherwise specified

Dark box at constant temperature

Monitor   Luminance meter
CS2000 / RD-80SA : 500 mm
*Measurement is made after 30 minutes of lighting of the backlight.

Measurement point: At the center point of the screen
Brightness distribution: 9 points shown in the following drawing.

<Landscape model>

Dimensional ratio of active area

Backlight   IL= (40.0) mA (Applicable terminal : LED+ - K1,K2,K3,K4,K5,K6)

TOPPAN INC.

2. Test Method

Notice	Item	Test method	Measuring instrument	Remark
1	Response time	Measure output signal waveform by the luminance meter when raster of window pattern is changed from white to black and from black to white. 	RD-80SA	Black display 　[Data]=00h White display 　[Data]=FFh TON 　Rise time TOFF 　Fall time
2	Contrast ratio	Measure maximum luminance Y1([Data]=FFh) and minimum luminance Y2([Data]=00h) at the center of the screen by displaying raster or window pattern. Then calculate the ratio between these two values. 　　Contrast ratio = Y1/Y2 　　Diameter of measuring point: 7.8mmφ(CS2000)	CS2000	
3	Viewing angle Horizontalθ Verticalφ	Move the luminance meter from right to left and up and down and determine the angles where contrast ratio is (10).	EZcontrastXL88	
4	White chromaticity	Measure chromaticity coordinates x and y of CIE1931 colorimetric system at [Data] = FFh 　　Color matching function: 2°view 　　measurement angle: 1°	CS2000	
5	Center brightness	Measure the brightness at the center of the screen.	CS2000	
6	Brightness distribution	(Brightness distribution) = 100 x B/A % A : max. brightness of the 9 points B : min. brightness of the 9 points	CS2000
