## 1 Scope

DATA MODUL's PCAP solution 12018289 consists of a 10.1" capacitive touch screen. Please note that this is only a sub-assembly of the final product. The specification of the final end product might differ from this specification.

## 2 Touch Sensor and Cover Glass

### 2.1 Technical Parameters

Screen size	10.1 inch /25.7 cm
Format	wide
Composite	SITO with COF
Outline dimensions	232.84 x 147.0 x 1.1 mm (WxHxT)
Active area	226.0 x 139.0 mm (WxH)
Bending radius of tail	R = 2 mm recommended
Transmissivity	90% (min.)
Operating temperature and humidity	-30 to +85°C, < 90% RH
Storage temperature and humidity	-40 to +95°C, < 80 % RH
Tail connector	FPC-Connector (10 pin 0.5mm pitch)

### 2.2 Reliability Tests

Low Temperature Storage Test	-40°C for 480h
High Temperature Storage Test	95°C for 480h
High Temperature / High Humidity Test	85°C, 85% RH for 480h
Cycle test	-40°C(30min), 85°C(30min), 500cycles

### 3 Touch Controller (640T I<sup>2</sup>C)

The touch controller IC is provided as a COF (chip on flex) assembly.

#### 3.1 Electrical specification

Power supply	3.3V ± 5%
Vin ripple	40 mV peak-peak max.
On board voltage	3.3 and 6.6V max. (subject to configuration)
Power consumption	40 mW max. (subject to configuration)

#### 3.2 Interface specification

Protocol	I <sup>2</sup> C version 6.0		
Touch report	16 fingers simultaneously max.		
Resolution	4096 x 4096 (x/y)		
I <sup>2</sup> C address	0x4A or 0x4B		
HID-I <sup>2</sup> C vendor ID / product ID	0x03EB (Atmel) / 0x214D (mXT640T)		
Required pull-up resistance	Standard mode (100 kHz) 1k to 10k Fast mode (400 kHz) 1k to 3k Fast+ mode (1 MHz) 0.7k max. High-Speed mode (3.4 MHz) 0.5k to 0.75k		
Low input logic level	SDA, SCL -0.3V to 0.3x VddIO RES, GPIO		
High input logic level	SDA, SCL 0.7 x VddIO to VddIO RES, GPIO 0.85 VddIO to VddIO		
Low output logic level	CHG, GPIO 0V to 0.2 x VddIO		
High output logic level	CHG, GPIO 0.8 x VddIO to VddIO		

#### 3.3 Pin Configuration

Pin	Signal	Description
1	VDD	Power Supply
2	CHG	Change, need Pull Up
3	SDA	I <sup>2</sup> C Data, need Pull Up
4	SCL	I <sup>2</sup> C Clock, need Pull Up
5	RES	Reset, active low
6	-	<i>Do not connect</i>
7	-	<i>Do not connect</i>
8	ADDSEL	I <sup>2</sup> C address selection ( <i>GND for 0x4A, pull up to VddIO select 0x4B</i> )
9	I <sup>2</sup> CM	I <sup>2</sup> C mode selection ( <i>GND to select HID-I<sup>2</sup>C mode, pull up to VddIO to select I<sup>2</sup>C mode</i> )
10	GND	Ground

## 4 Optical Inspection Criteria and Handling Recommendations

### 4.1 Optical Inspection Criteria

For details on the optical inspection criteria, please refer to DATA MODULs Outgoing Spec or ask your local DATA MODUL sales representative.

### 4.2 Handling Recommendations

#### Precautions for operation

- Do not put a heavy, hard or sharp object on the product
- Do not bend the product in order to assure the reliability
- Do not put one product on the other. Otherwise, it may cause the product to be scratched
- Don't use any organic solvent acid or alkali solution.

#### Precautions for mounting

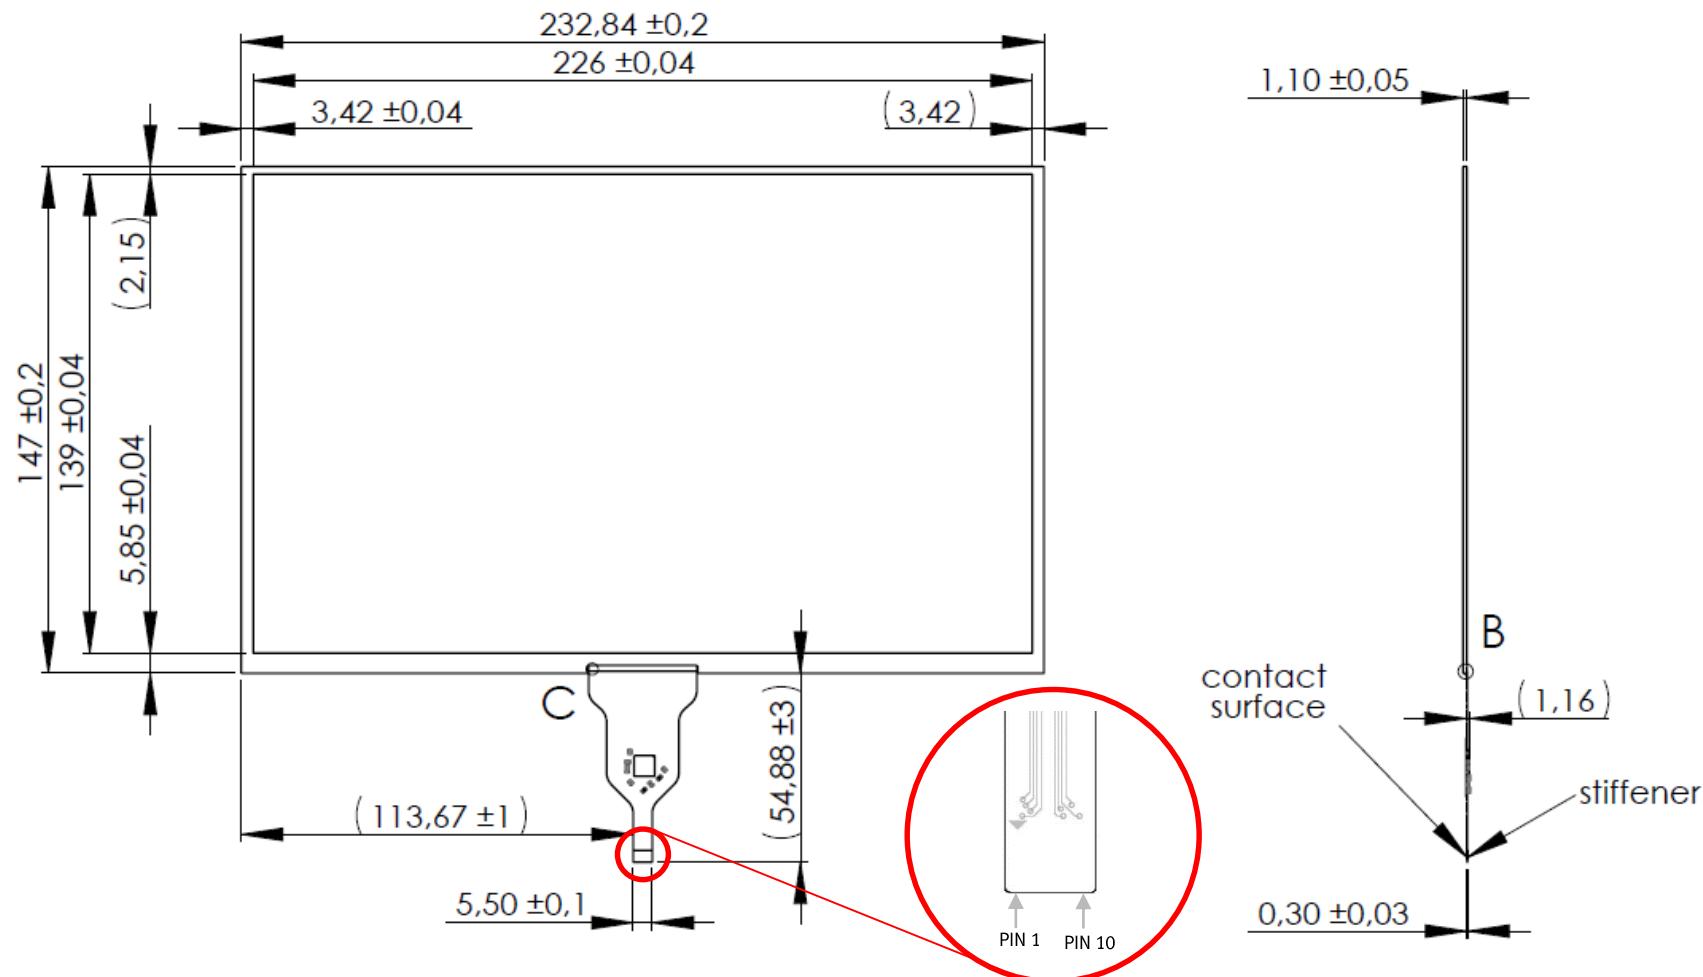

- The panel should be mounted using a configuration that either holds the panel by all four corners or by all four sides
- The bezel edge must be positioned outside the active area. The bezel may cause false activation if the edge overlaps the active area
- Any mounting configuration should ensure that there is no twisting force applied to the panel
- 1mm distance between TFT screen and touch panel is recommended

#### Precautions for tail

- The flex tail in general can be bent with a min. radius of about 1mm
- In order to avoid damaging and malfunction of the sensor, please don't bend the FPC area next to the panel
- Excess or repeated bending of the FPC connector should also be avoided

## 5 Appendix A: Technical Drawing

(Size in mm)

## 6 Revision History

Date	Author	Changes
08/27/2019	T. Golling	initial version
02/03/2020	T. Golling	location of pin 1 in drawing added, page 6
