### 4.2 Handling Recommendations

Precautions for operation

- Do not put a heavy, hard, or sharp object on the product.
- Do not bend the product to assure the reliability.
- Do not put one product on the other. Otherwise, it may cause the product to be scratched.
- Don't use any organic solvent acid or alkali solution.

Precautions for mounting

- The panel should be mounted using a configuration that either holds the panel by all four corners or by all four sides.
- The bezel edge must be positioned outside the active area. The bezel may cause false activation if the edge overlaps the active area.
- Any mounting configuration should ensure that there is no twisting force applied to the panel.
- 1mm distance between TFT screen and touch panel is recommended.

Precautions for tail

- The flex tail in general can be bent with a min. radius of about 1mm.
- To avoid damaging and malfunction of the sensor, please don't bend the FPC area next to the panel.
- Excess or repeated bending of the FPC connector should also be avoided.
